

**International Embryo Transfer Society (IETS)
Member Subscription Form for 2011 for
ANIMAL REPRODUCTION SCIENCE**

Members of the IETS are entitled to a personal print subscription rate to *Animal Reproduction Science* at the special reduced price of US\$ 195.

Members will receive 28 issues per year for 2012 (Volumes 131-137), and can activate their subscription by completing and returning this form.

Animal Reproduction Science publishes original research and timely reviews on topics relating to reproduction and fertility in animals. This includes both fundamental research and applied studies, including management practices that increase our understanding of the biology and manipulation of reproduction. The focus is on animals that are useful to humans including food and fiber producing; companion/recreational; captive; and endangered species including zoo animals. *Animal Reproduction Science* has no page charges and only publishes papers after rigorous peer review.

The journal's scope includes the study of reproductive physiology and endocrinology, reproductive cycles, natural and artificial control of reproduction, preservation and use of gametes and embryos, pregnancy and parturition, infertility and sterility, diagnostic and therapeutic techniques. *Animal Reproduction Science* has decided not to publish papers that exclusively examine the *in vitro* development of oocytes and embryos; however, it will consider papers that include *in vitro* studies where the source of the oocytes and/or development of the embryos beyond the blastocyst stage is part of the experimental design.
