DABE Forum Announcement

Mark your calendars for the 2016 DABE Forum: Contributions from New Investigators, to be held Sunday, January 24, during the 42nd Annual Conference of the IETS in Louisville, Kentucky, USA. Four abstracts for presentation during the forum were selected from more than 70 submissions. As stipulated in the announcement, priority was given to those presenting research performed in domestic species, with a focus on developing biomedical models for preclinical and translational research. Please congratulate and support these new investigators by coming to the DABE Forum!

Marcia de Almeida Monteiro Melo Ferraz, doctoral candidate, Department of Farm Animal Health, Faculty of Veterinary Sciences, Utrecht University, Utrecht, the Netherlands
Abstract #52: Use of transwell cell culture and 3-D printing technology to develop an in vitro bovine oviduct

Anna Lange-Consiglio, PhD, Reproduction Unit, Large Animal Hospital, University of Milan, Italy
Abstract #226: Effects of microvesicles secreted from equine amniotic-derived progenitor cells on in vitro LPS treated tendon and endometrial cells

Monika Nowak-Imialek, DMV, Institute of Farm Animal Genetics, Department of Biotechnology, Friedrich-Loeffler-Institut, Mariensee, Germany & REBIRTH Research Group Reprogramming, Hannover Medical School, Hannover, Germany
Abstract #223: Generation of interspecies chimeras between primate induced pluripotent stem cells and porcine parthenogenetic embryos

Romina Bevacqua, PhD assistant researcher, Animal Biotechnology Laboratory, Buenos Aires University, Argentina
Abstract #243: Efficient edition of the bovine PRNP prion gene in somatic cells and IVF embryos using the CRISPR/Cas9 system
